MADE IN BRITAIN

SBD Approved Product

**Simple, secure and
cost-effective**

**Multi-point double cam
locking**

Patented design

**Meets PAS024:2016
as a critical component**

**Supercoat 500 silver
corrosion resistant finish**

**ISO 9001:2015
Manufacturer**

multilock locking system

for high performance window security

The Nico MultiLock is a high performance Security Locking System that is exceptionally strong and very easy to fit.

The innovative, patented twin cam design will easily achieve the PAS024:2016 Security Standard on most PVCu and aluminium window profiles.

A quality build and robust profile-specific keeps combine to ensure a long reliable life and light, smooth closing action. And low handle height options are available for accessible and adaptable homes.

What is more, the attractive Supercoat 500 silver finish provides excellent corrosion protection.

ABOVE: Robust profile specific keeps with four fixing holes provide extra strength and security.

RIGHT: Nico Supercoat 500 is a special corrosion resistant coating. Test Results indicate that finished products have achieved grade 5 (exceptionally high resistance to corrosion) as defined in BS EN 1670:2007, making them suitable for coastal or industrial environments.

Fitting Instructions

Select a MultiLock of an appropriate length and backset.

Mark the desired centre for the handle mechanism, machine a slot in the centre of the Eurogroove 12mm (10.5mm min) x 90mm long.

Drill a 12mm hole on the above centre line, 20mm or 22mm back from the front face of the MultiLock. Also drill two 10mm holes 21.5mm either side of the centre hole. (Note: these hole sizes may vary).

Secure the MultiLock in the sash ensuring that the handle driving mechanism is aligned with the handle mounting holes.

Set the MultiLock in an unlocked position and locate the keeps in the frame to clear the locking cams. Check that the locking cams are fully engaged with the keeps when the MultiLock is locked.

Secure keeps to frame and adjust eccentric cams if necessary.

Available to order

Products indicated with the Telephone Symbol are available to order only. Please ring for details and lead times.

multilock locking system

Technical Data

The MultiLock is easy to fit with adjustable seal compression and, for fabricator convenience, uses the same preparation as Nico Espagnolettes and Shootbolts – with common keeps across the complete Locking System range. The MultiLock is tested to loads of more than 5000N and has completed endurance testing of over 30,000 cycles in the Nico Test Centre.

Eccentric 7.8mm or 9mm mushroom cams allow weatherseal pressure adjustment to +/-1mm and heavy gauge materials and fixing points protect against attack.

A version with offset gearbox is also available for lower handle positions to meet the requirements of 'Lifetime Homes'.
